

# Weather forecasters and Ice Forecasters

## StormGeo Group

StormGeo are expanding our service in the Arctic regions, both through the newly established office in Anchorage and a newly won contract based in our office in Bergen. In order to support operations we are therefore seeking weather forecasters and ice experts with experience from Arctic regions. We are recruiting for positions both in the onshore operation center in Moscow and for people working remotely as a part of the onsite team on the operations itself.

Work will consist of both training and establishing of service, most probably in the StormGeo HQ in Bergen, Norway, and thereafter in our client operation center on a monthly rotation basis. The successful candidates will be able to have great influence on developing the service, and become members of a vibrant and growing international team which offers real possibilities for personal and professional development

### **Essential Requirements**

- Formal qualification in Meteorology for forecasters
- Formal qualification in Remote sensing and Ice analysis for Ice analysts
- Detail orientated with excellent written and verbal communication skills
- Ability and experience working within a fast paced team environment
- Fluency in both written and spoken English
- Minimum two years of arctic forecasting experience

**Location** Work as forecaster in Moscow and/or on vessels/oil rigs in the Arctic

**Closing** December 15th 2013

**Salary** Very Competitive

This is an exciting opportunity to join team; interested applicants should send a detailed copy of your C.V. (Résumé) and a covering letter to [recruitment@stormgeo.com](mailto:recruitment@stormgeo.com)

Any question related to the position can be raised to  
Chief Meteorologist Martin Q Grønnevet +47 48 22 46 50 [mqg@stormgeo.com](mailto:mqg@stormgeo.com)
