

ImpactWeather Inc., a wholly-owned subsidiary of StormGeo Group AS, operates a 24/7 state-of-the-art weather forecasting operations center providing severe weather notification, specialized forecasting and video forecasting services to a steadily growing number of worldwide onshore industrial clients and offshore marine operations, as well as several segments of the power and energy market. We are an ISO 9001 certified company; therefore our procedures and processes are continually evaluated against the highest industry standards. Investment in our personnel, computational capabilities and software tools are our top priorities.

ImpactWeather, Inc., is seeking meteorologists for anticipated positions at our **Houston, Texas** office.

MarineWatch Meteorologist Specialization:

- Site-specific severe weather forecasting, monitoring and alerting for clients around the world. Current forecast regions include offshore the U.S. East and West Coasts, Gulf of Mexico, South China Sea, West Africa, Brazil, Alaska, Australia, Mediterranean Sea and the Caribbean Sea as well as route forecasts for vessels traveling between regions.
- Client focused interaction including scheduled daily briefings, event specific conference calls, or special short-notice forecast discussion initiated by the client.
- Detail oriented with ability to multi-task. Global awareness of current synoptic weather while met-watching for clients in different regions. Handling client requests via email for operations in a fluid environment.
- Capable of providing on-site weather support to clients, onshore and/or offshore a plus.

TropicsWatch Meteorologist Specialization:

- Tropical Cyclone forecasting experience highly desired.
- Must be capable of giving high quality oral presentations in front of large audiences of clients and prospects.
- Interpret and analyze satellite, radar, model data, surface/upper-air observations, etc.
- Issue daily tropical outlooks, tropical cyclone track forecasts and site forecasts for the Atlantic, Pacific and Indian Oceans.
- Create daily tropical outlook and storm-specific videos.
- Know and understand client-specific tropical weather threats and effectively communicate those risks via email and phone.
- Thorough understanding of tropical cyclone climatology and meteorology, including knowledge of formation, strength, evolution and steering of tropical cyclones.
- An above-average skill with MS Office (Word/Excel) is a plus.
- Occasional research-related duties.

StormWatch Meteorologist:

- Severe Weather monitoring and alerting for clients subscribing to StormWatch services.
- Ability to multi-task, issuing Severe Weather Alerts, Forecasts, and Threat Assessments for clients across the world in a timely and accurate manner.
- Create global forecast and hazards maps for clients with international weather interests.
- Effectively lead meteorological discussions with clients via conference calls, whether a scheduled daily briefing or a special short-notice discussion initiated by the client.
- Capable of providing on-site weather support to clients a plus.

Requirements for All Meteorologist Positions:

- B.S. in Meteorology or Atmospheric Science or equivalent military training required.
 - Windows PC, MS Office, Linux. GARP, NMAP and UNIX desirable.
 - Strong interpersonal communication skills.
 - All positions require a rotating shift schedule.
 - Exhibit a positive attitude and display winning team attributes.
- Professional appearance, strong work ethic and a willingness to accept change and adapt are required.
