

1st MedCyclones WORKSHOP and TRAINING SCHOOL

University of Athens, Greece

Workshop: 27 – 29 June, 2022

Training School: 27 June – 2 July, 2022

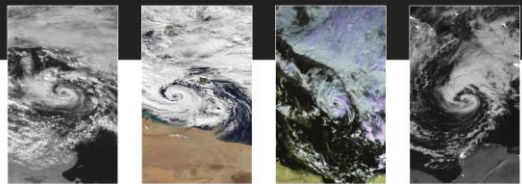

Application Deadline: 30th April, 2022

For further information <https://medcyclones.utad.pt/>

The general objectives of the 3-day MedCyclones **Workshop** are to present and discuss recent scientific progress in understanding processes and impacts of the Mediterranean cyclones, as well as their monitoring and forecasting, from weather to climate time scales. We aim to establish and foster efficient networking and collaborations between stakeholders, professionals from weather/climate services and academic researchers.

"Medicane": Mediterranean Hurricanes

29/Sep/2018

The 6-day **Training School** will focus on weather-timescale aspects of Mediterranean cyclones: dynamics, processes, forecasting and predictability. In the first three days (27-29 June) afternoon lectures will be given allowing the Trainees to fully attend the workshop activities. The last three days will be devoted to full day courses, practical exercises and interactive discussions. The **Training School** is primarily addressed to PhD students and early career investigators but professionals and scientists from regional and national meteorological agencies are also encouraged to apply.

Applications are now open
